CONTENT OF COMMUNITY BASED NATURAL RESOURCE MANAGEMENT TRAINING MATERIAL

Sl. No.	Content	Page No.
1.	Natural Resources – Meaning and Importance	1 – 5
2.	Natural Resource Depletion: Causes (Natural and man-made) and consequences (Productivity, Climate, Rainfall, Temperature, Health etc.)	6 – 11
3.	Climate change: Global warming: Greenhouse effect	12 – 21
4.	Watershed: Ecological bank of rural economy	22 - 24
5.	Watershed: Interlinkage with livelihood	25 – 26
6.	Water Cycle	27 - 30
7.	Role of forest in recharging ground water	31 – 34
8.	Concept of NRM & CBNRM	35 – 37
9.	Importance of Community participation for sustainable NRM	38 – 39
10.	Integrated Natural Resource Management	40 – 44

LEILUNG HAUSAKNA: A AWMZIA LEH A PAWIMAWHNA

(Natural Resources: Meaning and Importance)

Leilung hausakna kan tih hi khuarel a, leilunga kum tam tak kalta atanga lo insiam, mihringte tana thil tangkai takte an ni. Heng leilung hausakna kan haichhuah te hi kan lo her danglamin kan thil mamawh te kan lo chher chhuak veleh thin a ni. Mihring ten a heng leilung hausakna kan chhawr tangkai tam tak te hi ramsate leh thlai te pawhin an dam khawchhuah theih nan an mamawh ve bawk a ni. Kan nitin nunah, kan thil tih kawng engkimah, boruak kan hip luh atanga kan ei leh in zawng zawngte hi leilung hausakna atanga kan hmuh vek te an ni a, an tello chuan nunna a awm thei lo a ni.

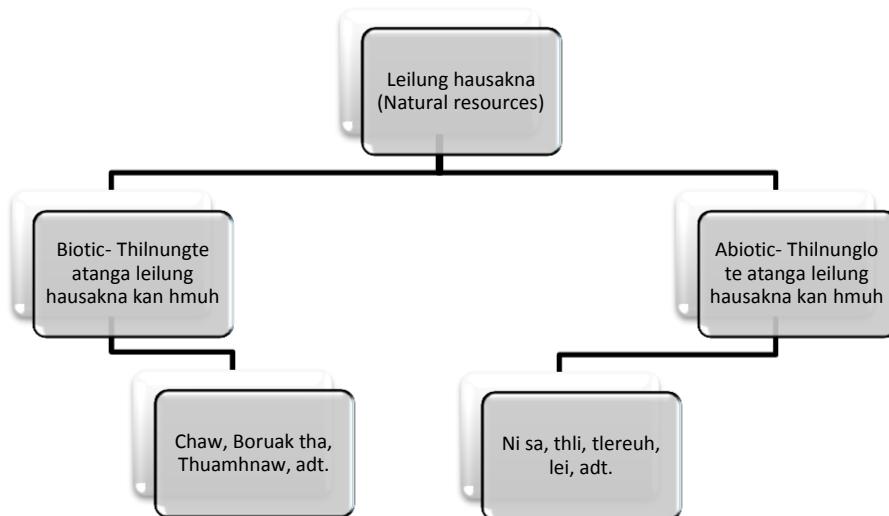

Leilung hausakna chuan heng- ni eng, boruak lum leh vawt, tui, lei leh a kaihhnawih thil zawng zawng, thlai, adt. zawng zawngte hi a huam vek a ni. Tin, leilung hausakna kan tih hian kan chhehvela thil awm zawng zawng leh hmanraw tangkai ni thei zawng zawngte hi a huam tel vek bawk. Mihring siamchhuah thil reng rengte hi leilung hausakna hmanga siam vek an ni a, a bak zawng heng- lei, tui, boruak leh ramsa; tin, tuialhthei, lungalhthei, lunghlu leh thil dang zawng zawng lei atanga kan haichhuahte hi leilung hausakna huang chhunga mi vek an ni.

Heng leilung hausakna te hi chi hrang hrangin a then hran theih a, an lo insiam chhuahna azirte (origin), an upat dan azirte (stages) leh an insiam thar leh theih dan (renewability) azirtein i lo zirho dawn teh ang u.

A. An lo insiam chhuahna a zirin (Origin): Leilung hausakna te hi an lo insiam chhuah dan azirin chi hniih a then theih a, chungte chu-

1) Thilnungete atangin (Biotic): Heng leilung hausakna te hi ramngaw (thing, mau, thlai leh hnim) leh ramsa atangte leh anmahni atanga lakchhuah theih thil kan hmuh theih te hi an ni. Heng hausakna te hi kan nunna hnar boruak kan hip luh (Oxygen) kan hmuhna leh kan nitin chaw kan hmuhna te an ni. Lungalhthei (coal) leh Tuialhthei (petroleum) te pawh hi hemi zar hnuiaia dah tel ve an ni, a chhan chu thlai leh ramsa thi tawih te atanga lo insiam an nih avangin.

2) Thilnunglo te atangin (Abiotic): Heng leilung hausakna te hi thilnunglo leh thil tawih theilo te atanga lo insiam an ni. Heng hausakna zinga thenkhat thir lam chi ho te hi lei chhungril thuk takah an inphum a, mithiam ten khawl hmang a laichhuakin, thil tha leh pawlmawh dangah te an siam veleh thin a ni. Heng hausaknate kan tih te hian- lei (land), tui, boruak leh thir lam chi heng- lunghlu (diamond), rangkachak (gold), dar, adt. a huam a ni.

B. An dinhmun azirin (stage of development): Leilung hausaknate hi an upat dan azirin emaw an dinhmun anzirin chi thum-ah a then theih.

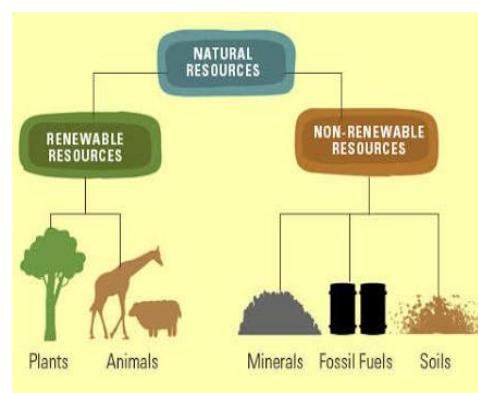

a) Hma huna la hman tur (Potential resources): Heng leilung hausakna te hi lei chhungri a awm, mahse nakin huna hman tana la khek thatte an ni. Entirnan, lungalhthei khur hmuhchhuah a ni a, mahse laih a, siakchhuah a nih hma chuan nakin huna hman atana khel khal a la ni rih tihna a ni.

b) Hman mek hausakna (Actual resources): Hei hian leilung hausakna thenkhat an hlutna, an tam lam leh an that lam (quantity and quality) chhui chian tawh leh tun huna hman mek tawh te a huam. Entirnan, tuialhthei (petroleum) tuna Bombay High Fields atanga siak chhuah mek, hman tur atana sawngbawl leh thawnchhuah mek te hi an ni. Heng hausakna te hmang tur hian sum leh thiamna khawl (technology) tha te neih angai a ni.

c) Hlawk zawka la hman theihte (Reserve resources): Hei hian tun huna hman mek (actual resources) thenkhatte nakin lawka hlawk zawka la hman theih tura dah that te a huam a ni. Entirnan, tuialhthei laihchhuah tawh thenkhatte chu a van huna hman atan an dah tha thin. Tin, hausakna (resources) thenkhatte chu khawl lam that tawk loh vang ten la hman loh leh khawih loh in an dah thin a, chung chu “Stock resources” an ti vet hung a ni.

C. Hman nawn theih leh hman nawn theih loh (Renewable and Non-renewable): Leilung hausakna thenkhatte chu hman tawh hnuah an rawn in siam thar leh zel thei a, a then te erawh hamn zawahah an ral mai thung.

i) Hman nawn theih (Renewable resources): Heng hausakna (resources) te hi anmahni tawkin an

insiam thar leh zel thei a ni. heng- Ni zung chakna, boruak, tui, thli, adt. hi mihringten hmang NASA viau mah ila kan mamawhchu kan phuhru zo tho a ni. A thenkhatte chu rang takin insiam leh zung zung thei ni mahse kan hman nasat chuan an khawbaw zo ve thei tho a ni.

ii) Hman nawn theih loh (Non-renewable): Heng hausakna te hi muangchangin an insiam nawn leh thin a, a thente phei chu an insiam nawn leh tawh ngailo. Lunghlu laihchhuah kan tih mai te hi entirna lar zual deuh te an ni. Heng lunghlu leh dar kan laihchhuah te hi kum sang tam tak lei hnuaia lo insiam tawhte an ni a, an insiam nawn nan chuan kum sang chuang bawk a mamawh leh dawn a ni. Hetiang hi an dinhmun a nih avangin renchem taka hman loh chuan hun reilote hnuah hman tur an awm lo zo mai dawn a ni.

LEILUNG HAUSAKNA PAWIMAWHNA TE

Kan sawi tawh angin leilung hausakna te hian kan nitin nun leh hun hman an thunun tih theih a ni a, an tel lo hian minute khat lek pawh kan awm thei lo tih hialin a sawi theih ang. An pawimawhna te chu chipchiar zawkin ilo thlir ho dawn teh ang.

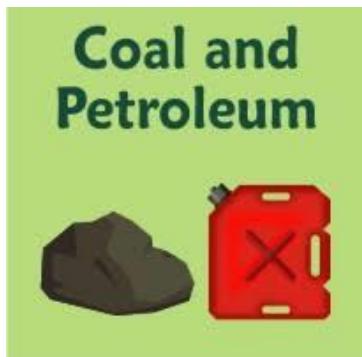

1. Kan nunna hnar boruak tha (oxygen) min pe: Kan dam khawchhuah nan leh kan taksa in tha taka hna a thawh theih nan boruak tha (Oxygen) hi kan mawmawh ber a ni a, he boruak tha (oxygen) hi thing leh hnim hring atangtein kan hmu a ni. Kan pian tirh ata tawh a thlawn oxygen kan dawn te hi a man han chhiar dawn ila chu rul zo tumah kan awm hlek lovang.

2. Kan ei tur chaw min pe: Kan than len nan leh thahrui chakna kan neih theih nan chaw ei kan mamawh a, chung kan chaw tha ei te chu thlai

leh ramsa te atangin kan hmu a ni.

3. Bungrua leh insakna hmanrua min pe: Insak nana kan hman thing leh mau zawngte hi ramngaw atanga kan hmuh te an ni a, chenna atan leh inhumhimna atana kan mamawh zawng zawngte min pe a ni.

4. Tuialhthei (petroleum) leh lungalhthei (coal) min pe: Lirthei, rel, lawng leh thlawhtheihna zawng zawngte hian tuialhthei (petrol and diesel) an mamawh vek a, heng an mamawh te hi leilung hausakna atangtea kan hmuh an ni. tin, rel thenkhat, lawnglian leh thil siamna hmunpui (industry leh factory) ah te hian lungalhthei (coal) an hmang nasa em em bawk.

5. Chakna thahri (energy) min pe: Leilung hausakna hmang tangkai hian kan nitin mamawh heng- kawlphetha te, ni zung chakna (solar energy), thli chakna (wind energy), tui chakna (water resources/energy) leh adt. kan hmu bawk a ni.

6. Tlereuh leh thuamhnaw te min pe: Lei hnuai atanga lunghlu leh rangkachak an laihchhuah te hmangin tlereuh eng ilo fahran te kan siam chhuak. Tin, thlai leh ramsa atangte pawhin thuamhnaw inbel tur te kan siamchhuak bawk.

LEILUNG HAUSAKNA LUANGRAL (Natural Resources Depletion)

Mihringte hian kan damkhawchhuahna atan kan kan chhehvel a thil lo awmsa hrang hrang te hi kan mamawh a. Thil chhiava mai mai anga kan ngaih pawh her danglama hmanraw tangkai zawk a kan chher chhuah khan hausakna (resources) ah kan chhiar tel ve mai zel a ni. Leilung piantirh ata tawh leilung hausakna te hi chinlemneilovin (Over-exploitation) kan lo hmang tawh a, kum sang tamtak liam hnuah hian heng kan leilung hausakna te hi an chereu in an lo luangral (deplete) zo ta! Kan duhamna te leh chintawk kan hriatlohma te chuan awlsam taka insiam thar leh zung zung mai thei an nih lohzia te, hman luata chhe thei an nihzia te min theihngihlhtir zo ta!

Tin, he leilung hausakna chereu leh luangral hi mihringte chauh thlen a ni bik lova, khuarel chhiatna (natural calamities) leh anmahni tawka chereu (natural extinction) te pawh an ni ve bawk. Heng leilung hausakna te hi eng thil ten nge lo tichhia a, eng nge a nghawng tih te i lo zir ho dawn teh ang.

KHUAREL (NATURAL DEPLETION)

1. Khuarel chhiatna (Natural calamities): Khuarel chhiatna hi khawvel hmuntin maiah a thleng vek a, heng thil te hian mihringte mai bakah nungcha te leh thildang tam takah chhiatna leh harsatna a thlen bawk a ni. Heng chhiatna thlengte hi leilung hausakna tichereutu lian berte zinga mi an ni. Heng- leimin (landslides), tuilian (Floods), Kangmei (forest fire) leh adt. hi nungcha tam tak nunna suattu leh tichereu tute an ni.

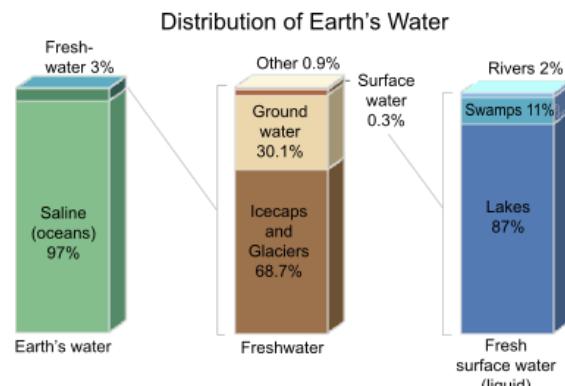

2. Heng chhiatna thlengte hian nungchate tawmhimna leh chenna hmun tam takte chu tichhia in nungcha tam takin an tawrh phah a, a thente chu hmundangah te pemin an lo chereu zo thin a ni.

3. Natural extinction (Kharel vang a chereu): Nungcha tam takte erawh chu anmahni tawkin khuanu ruat angin an chereu ve thin bawk a. Hman ata tawh nungcha thenkhatte chu kawppui neih loh vangte, tin, kan humhalh that tawk loh vangte a chereu an ni tlangpui. Nungcha chi tam takte chu he leiah hian hmuh tur an awm tawh lo a ni.

MIHRINGTE VANG (Man-made Depletion)

1. Uchuak taka hman (overuse/irrational use): Khawvel ram hrang hrangah hmasawnna a thang chak hle mai a, chumi um phak tur leh mihringte mamawh phuhru turin kan leilung hausakna heng-tui leh tuialhthei te chu chinlem nei lovin kan hmang ta chiam chiam mai a, hei hi kan leilung hausakna kan tihchereuna lian tak pakhat a ni. Entirnan; lirthei sil na atan a renlo tak a tui kan hmang teuh teuh ang chi te hi.

Eng nge nghawng a neih?
Khawvela tui awm zawng zawng za zela 97 te hi chu tuifinriata tui al, ei tlak loh leh hmantlak loh an ni a, za zela 2 te chu vur tlang te an ni leh a, a la bang zaa pakhat chiah hi tui thianghlim in tlak a ni. kan kham khawp lo hle a ni.

2. Ramngaw tih chereu (deforestation):
Ramngaw atang hian boruak thianghlim hip luu tur kan hmu a; insakna bungrua leh thing tuah tur te leh thildang tam takte kan hmu bawk a ni. Mihringte hian kan mamawh phuhruk nan heng ramngaw te hi kan kit thlu nasa em em a; thing pakhat than len nan kum tam

tak a duh a, an than len hun pawh nghak lova duham taka heng ramngawte kan thiah hian nasa takin a ti chereu a ni. Mithiam te chuan 'thing 1 kan kih reng reng in tiak 3 zel kan phun leh thin tur a ni' tiin an lo sawi hial thin a ni.

Engvangin nge ramngaw te chu kan thiah?

- a) Khawpui thang zelah mipui (population) an lo pung ve zel a, hei hian loh theih lohvin chenna tur hmun atan thing leh ramngaw te chu min thiah tir thin.
- b) Insakna tur bungrua leh eirawngbawlnaa tuah tur thing (firewood) kan lakkhawmnaah thing leh mau tam takte kan kit ruih ruih a, hei hian nasatakin a ti chereu a ni.
- c) Thil siamna hmunpui (Industry leh factory) bun na tur hmun atan a rampalaileng leh khawpui atang a penhleh deuh hlek hmun te kan thiat nasa in ramngaw tha tak tak kan luahlan nasa hle a ni.
- d) Tlangram loneih (Shifting cultivation) a vangin thing leh mau tam takte ti chereuin kan hal ral thin a, hei hi ramngaw ti chereutu leh boruak ti bawlhhlawhtu lian tak a ni.

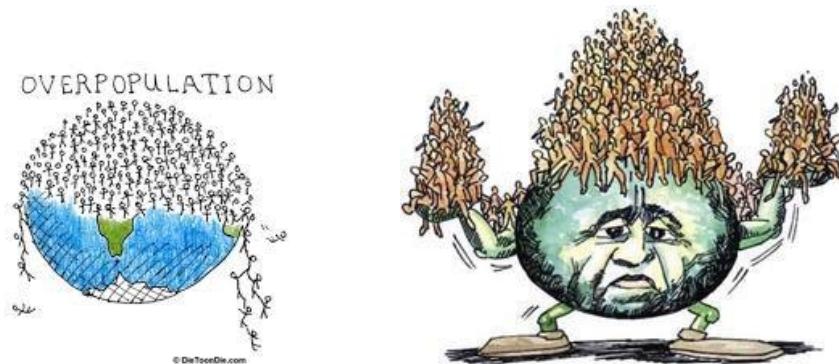

3. Mipui pung zel (population growth): Khawvel thang zelah mihring chengte pawh kan lo pung tawlh tawlh a, hei hian harsatna namen loh min thlen mek a, chung zinga pawi ber pakhat chu leilung hausakna a ti chereu tel hi a ni.

- i) Khawvel mipui pung zel avangin kan mawh hrang hrang te a pung chho ve zel a, chung kan mamawh phuhruk tur chuan puankawp sawr ang maiin kan leilung chu a theih ang angin kan sawr tluk tluk a ni ta ber mai a. Leilung hausakna atheih ang a tam sawrchhuah kan

tumna lamah hian kan chenna hi kan ti chereu ve mek zekl bawk si a ni.

- ii) Mipui kan pun zel avang hian chenna tur hmun kan mamawh belh zel a, chuvang chuan ramngaw dur pui puite thiah an lo ngaih phah fo thin a ni.
- iii) Mipui pung zelah inchhung khura kawlpetha (electricity) mamawhna a lo sang zel a, thil siamna hmunpuiah (industry leh factory) pawh an mamawhna te phuhru turin lungalhthei dah that tam takte hman ral an la ni thuai ang.

Leilung hauskna tih chereuvin a nghawng te (Consequences of natural resources depletion):

Leilung hausakna kan tih chereu hian nghawng tam tak a nei thei a, mihringte, nungcha te leh thlai te thleng in a nghawng thin a ni. Kan chhehvel boruak vawng fai tu, ei leh in tur tha min petu, kan khawsak tiawlsam a, zin vei vah ti awlsam tu, kan incheina leh thuam zawng zawng hnar kan tih chereu hian eng ang harsatna tak nge kan tawh theih ilo thlir ho ang u.

1. Ramngaw tih chereu (Deforestation): Ramngaw kan tih chereu hian ramngaw dur pui puite kan thiat in kan daidarb a, hei hian heng a hnuia tarlan harsatna te hi a thlen thei.

i. Thlai thar lamah (Productivity): Thing leh mau kih/ suat hian lei chunglang hangtha kalral tur (Soil erosion) vengtu kan ti chhia a ni zel mai a, chuvang chuan thlai chinna atana tlak loh ram; rambua leh ram chhia te a lo awm phah ḫin a ni. Leichunglang luang ral avang hian lei in a tharchhuah theihna (Productivity) nasa takin a nghawng in hlawk taka thlai thar thei tur chu a zahve laiin a tlakhniam tir phah thei.

ii. Khaw lum leh vawt (Temperature): Thing leh mau kih hian khua a tilum zual zel in global warming avang a harsatha hrang hrang kan tawk chho mek zel a. Ozone pawp leh green house effect te avangin chhiatna dang neuh neuh thleng thei tam tak a awm bawk a ni.

iii. Nungchate leh ramngaw (Biodiversity): Thing leh mau tih chereu hian nungchate chenna tur ngaw a ti chhia a, hemi vang hian nungcha tam takte chu chenna leh eitur neihloh vangin an chereu mek zel a ni. Hei mai bakah hian, thlai ḫenkhatah chu anmahni in an ḫiak mai thei ḫinlo a, ramsa leh sava ten a chi an ei a an paitawih phawt te a ngai ḫin a. Heng thing/ thlai rah eitu ramsate an chereu vang a thing/ thlai khawvel aṭang a chereu zo ta eng emaw zat sawitur a awm tawh a ni.

iv. Hriselna (Health): Boruak thianghlim min petu ramngaw kan tih chereu thin avang hian boruak hrisello in kan chhehvel an luahkhat nasa a, hei hian kan hriselna kawng tamtakin a tih khawlo thei. Khawpui ḫenkhatah phei chuan boruak thianghlimloh em vangin hmaikawr vuah a lenchhuah a ngai hial tawh a ni. Tin, ozone pawp avangin nizung natna te kan tuar nasa chho zel a, vun cancer leh chuap cancer te natna tlanglawn tak a rawn ni chho ta mai hi kan chenna leilung leh boruak kan dimdawi loh vang a kan tawh a ni.

2. Ruahtui (Rainfall): Ramngawte hi kan chenna a tui kal kualna (Water cycle) kawng a pawimawh em em a ni a. Ramngaw te hian a chhehvel boruak lo ti dai in ruahui a tlak tam theih nana kawng hawngtu pawimawh tak a ni.

3. Tuialhthei (oil & petroleum): Tuialhthei lei hnuai atanga kan siak chhuah te hi ral thei leh insiam nawn leh mai mai theilo an ni a, renchem lo taka hman hian harsatna lian tak ahnuiaia tarlante hi kan hmachhawn thei:

a. Tuialhthei hnianghnara a awm loh chuan nasatakin kan nitin nunphung a khaihlak ang a, kan zin veivahna leh sumdawnna ah harsatna namenlo in min tlakbuak thuai dawn a ni.

b. Tuialhthei kan renchem loh chuan kan mamawhna sang zel phuhruk tumna lamah kan leilung hi kan tichhe thuai ang a, chuchuan ei leh bar kan mamawh nasatakin a nghawng ngei bawk ang a, tam leh khawkheng kan hmachhawn mai dawn a ni.

4. Dam khawchhuah nana beih (Struggle for existence): Pu Mahatma Gandhi chuan 'Khuarel hian mitin mamawh tawk phuhruk thei mahse mitin duhamna erawh a phuhruk theilo a ni' (*earth provides enough to satisfy every man's needs, but not every man's greed*) tiin a lo sawi tawh a, kan mamawh bak a leilung hausakna neih tuma kan intlansiakna hian kan leilungah nghawng thalo tak nei theiin hun reilote lo kal turah chuan kan damkhawchhuahna tur a kan neih chhun chhun leilung hausakna inchuh hian buaina zakhua kan la hmachhawn in a dingchangchnag damkhawchhuahna khawvelah kan let leh thei a ni.

CLIMATE CHANGE: GLOBAL WARMING: GREENHOUSE EFFECT

WEATHER Vs CLIMATE: Weather leh climate hi sawi pawlh awl tak thil inang chiah si lo a ni. Weather chu 'hun rei lo te chhung, minute hnih khat lek te, ni hnih khat emaw kar hnih khat chhung a khaw awmdan' sawina a ni mai awm e. Climate chu 'hun rei tak chhung, kum 20/30 chhunga sik leh sa kalphung emaw awmdan emaw sawina' tiin sawi ila a fiah mai awm e.

CLIMATE CHANGE: Climate change chu sik leh sa hunbi emaw nihphung inhlak tihna a ni mai awm e. Khawvel hmun hrang hrang in sik leh sa kan dawn dan a inang lova, hmun thenkhat ah nipui an hman lain hmun dang tan thlasik a ni thei. Chutihrual in, kum tam tak chhung hun in a her chhuahpui thin ang nilova sik leh sa a lo inher danglam hian '*climate change*' kan tih chu a lo awm tihna a ni. Ram/hmun vawt tak ni thin, vawt ta lo tial tial te, ruahrtui tlak thatna hmun thin ruahrtui tla mumal ta lo te, a kum tel a ram/hmun lum tial tial te hi '*climate change*' entirna chu a ni. A nihdan thin pangngai pel a sik leh sa a lo danglam hian '*Climate change*' a thleng tiin an sawi thin. Sik leh sa inhlak in a ken tel thil langsar zual deuh deuh te lo chhui zui dawn ila..

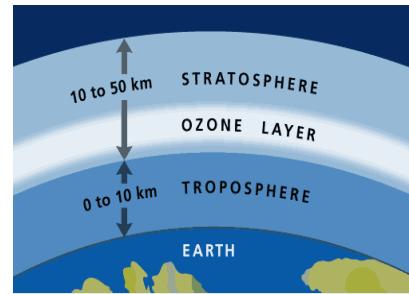

GLOBAL WARMING: Sik leh sa inhlak (Climate change) in a ken tel zinga langsar ber pakhat chu '*Global warming*' hi a ni awm e. Global warming tih chu khawvel lumna chawhrual lo sang ta sawina a ni mai. Khawvel hmun hrang hrang hi a inang lo a, an lum

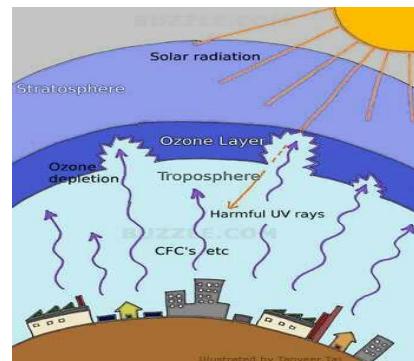

leh vawh dan a inang hek lo. Hmun pakhatah lum hle mahse hmun dangah a vawt a; chung zawng zawng la khawm chuan khawvel pumpui lumna chawhruala a hma aia a lo lum ta a nih chuan global warming a lo awm ta tihna a ni.

GREENHOUSE EFFECT: Greenhouse chu darthlalang emaw puan ln, a chhunga thlai an chinna hmun a ni a; darthlalang ln a nih avangin ni zung a rawn kal tlang thei a, engemaw zat chu pawn lam ah a chambang ve bawk. In chhung a lo thlen hnuah ni zung chu a inkhawh let veleh a, a then chu darthlalang tawn tlangin van boruakah a inkhawh chhuak a, a then erawh chuan an tawn tlang ve zo lo a, in chhungah chuan a chambang ta a, in chhung boruak chu a tilum mai thin a ni. Kan chenna khawvel pawh hi chutiang deuh chu a ni a, hetiang a boruak leh ni zung in chet vel dan hi a nihphung pangngai ah chuan mihring leh leilung tan a tha tawk tura khuanu duan sa a ni. Greenhouse chung darthlalang aiah khan boruak bawlhhlawh a awm ve ta thung a, ni zung chuan a rawn tawn tlang ngei a; mahse ni zung thenkhat inkhawh let tur chu boruak bawlhhlawh chuan a lo dan tak avangin khawvel chu a tih lum belchchhah ta a. Khawvel boruak lumna tizualtu leh thlentu ber chu boruak bawlhhlawh (greenhouse gas) an tih te chu an ni.

Heng boruak bawlhhlawh greenhouse gas (CO₂, methane etc.) an tih te hi mihring in kan thil hman leh siam atangte, leilung in a ken tel atang te in a chhuak nasa a. Van theng reng ah han thamral ta mai lovin, khawvel tuamtu boruak ah an chambang ta hlawm a ni. Chutiang a chambang te chuan lei atanga lumna van lama let leh tur kha a lo hip beh thin avangin lei lam boruak chu a nih tur ang aiin a lum ta tial tial a, '*global warming*' chu a thleng ta a ni tiin mithiam ten an sawi.

GREENHOUSE GAS TE CHU ENGTE NGE NI:

- i) **Carbon dioxide:** Khawvel lumna thlentu zinga a bulpui leh langsar tak chu Carbon dioxide hi a ni. Carbon dioxide hi petrol/diesel etc.

hmang chi motor leh khawl atanga chhuak a tam ber a, ram changkang apiang ah a nasa emaw tih tur a ni. Mizoram ah chuan Lo halna atang hian carbon dioxide hi kan pechhuak tam ber in a rin theih a, khawpui ah chuan motor khu atang in a nih a rinawm. Tin, ram ngaw chereu nasa lutuk hian boruak a carbon dioxide a tih tam phah em em a ni.

- ii) **Methane (CH₄):** Carbon dioxide dawta pawi khawihtu lian tak chu Methane hi a ni. Boruaka lumna lo hip bet tur hian Carbon dioxide ai khan a let 20-in a thawk hlawk zawk niin mithiamte chuan an tarlang. Methane hi leilung atanga lo piangchhuak (natural) leh mihring in lungalhthei (coal) kan hal khu atangte, petrol/diesel etc. atangte, ran ek leh chirhdup hmun rimchhia atang a lo awm a ni.
- iii) **Nitrous oxide (N₂O):** Nitrous oxide chu boruak chi khat, rawng nei lo, kang thei lo, thlum rim nam chêk a ni a, 'nuihna gas' (laughing gas) tia hriat lar a ni. Nitrous Oxide hi ramngaw leh tuifinriatte hian a tichhuak ve reng. Mihring chuan nylon siamna te, nitric acid siamna te, leitha siamna te, motor leh thlai lam thil hal atangin kan tichhuak thin.
- iv) **FLUORINATED GASES:** Chlorofluorocarbons(CFCs), Hydrofluorocarbons, perfluorocarbons, sulphur hexafluoride leh nitrogen trifluoride te hi a larzual te an ni a, hetiang gas hi kan hmanna langsar tak chu refrigerator(fridge) te, lawng leh thlawhtheihna a gas kan hman hi a ni awm e.
- v) **TUIHU (water vapour):** Global warming thlentu lian tak pakhat chu Tui Hu hi a ni awm e. Mihring khawsak sang zel ah, boruak ah thui hu a chhuak tam a, chumi leng vel chuan boruak a hnawng a siam a, boruak hnawng (humidity) sang chuan boruak a ti lum zual em em a ni.

A chung a kan sawi tak lo pawh hi sawibelh tur a la awm thei ang. Heti chin hi duhtawk phawt mai ila tha awm e.

GLOBAL WARMING IN A NGHAWNG TE: Khawvel lo lum zel hi amah mai chuan a ngaihmawhawm ngawt lo a, a nghawng chhe zel zawk hi a ngaihmawhawm ta chu a ni awm e. Tawi te te in lo thlur bing dawn ta ila:

- i) **SIK LEH SA INTHLAK NASA:** Global warming in a nghawng pui ber chu sik leh sa inthlak nasa hi a ni awm e. Khaw lum uchuak leh vawt uchuak (extreme climate) te hi a thleng nasa dawn a, a thleng mek bawk a ni. Sik leh sa mil zel a thlai tuh leh seng hun in awmzia a nei lo tial tial a. Khawkheng te, ruahrtui tla tlem lutuk emaw ruahrtui tam lutuk avanga harsatna te a tam deuh deuh dawn niin a lang. Hmun thenkhat ah tui a van em em lain thenkhat ah tuilian vang in harsatna a thleng bawk ang. A tawi zawng in ei leh bar zawn na kawng ah nghawng thui tak a nei ti ila kan sawisual awm love.

- ii) **TUIFINRIAT CHIM CHIN A SANG ZEL:** Boruak lum zel avang hian Vur tlang te chu an tuiral hnem tial tial a, chu chuan tuifinriat chim chin a ti sang zel a ni. Hei hian khawvel pum a nghawng a, vur tawl te, tuilian te siam in, ruahrtui tlak dan thui tak a nghawng bawk a ni. Tin, boruak lo lum zel vang hian vur ram leh tui a cheng nungchate a nghawng nasa em em bawk a, nungcha thenkhat phei chu an mang phah dawn niin mithiam ten an sawi.

iii) **THLIPUI/CYCLONE A SIAM NASA:** Boruak lum zel hian tuipui a tui te a tih lum belh nasa a, chu mi in a nghawng chu thlipui rapthlak cyclone/hurricane te hi an ni. Kum 2014 a USA a thlipui rapthlak tak, Hurricane Katrina te, 2015 a Hurricane sandy an tih te kha Global warming in a nghawng langsar a sawi te an ni.

iv) **MIHRING HRISELNA A NGHAWNG:** Mihring nunna leh a chhevel a thil thleng zawng zawng hi a inzawm vek ti ila a dik mai awm e. Global warming in a nghawng nasat tur zing ah pawh hian mihring hriselna ni sawi hmaih theih a nilo. Global warming vang hian natna theh darhtu leh natna a pung bawk ang tih a ni a, chung zingah chuan malaria, dengue fever leh kawthalo te hi an lang lian hle. Vun natna (skin disease) te a hluar zel ang a, mihring in a mamawh tawk tui a hmuh loh vang a natna pawh pung zel tur a rin a ni.
